This application contains claims directed to the following patentably distinct species of the claimed invention:

1. a p type layer of claim 1 consisting of a single layer of III-nitride material.
2. a p type layer of claim 1 consisting of a single layer lattice matched to III-nitride
3. a p type layer of claim 1 consisting of multiple layers of III-nitride.
4. a n type layer of claim 1 consisting of a single layer of III-nitride material.
5. a n type layer of claim 1 consisting of multiple layers.
6. quantum well layers are polar.
7. quantum well layers are non-polar.
8. said window layer has a particular bandgap.
9. said window layer is positioned close to the illuminating side.
10. said infrared emitter emits photons created by relaxation...
11. said infrared emitter emits photons 20meV-1.3 eV.
12. said infrared emitter emits M infrared photons...
13. claim 31 specific structure.
14. claim 33 specific structure.
15. claim 35 specific structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 2815

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
